

OOP with Java – Important Questions

- 1. What is Java Language and how is it different from other programming languages?**
- 2. What are the features of Java language?**
- 3. What was the reason behind the Java language?**
- 4. Who invented Java language?**
- 5. What is the latest version of Java language?**
- 6. What is Java JDK?**
- 7. What is the default extension of a Java source code file?**
- 8. What is NetBeans or Eclipse?**
- 9. What is Object-Oriented Programming (OOP)?**
- 10. What do you understand by the term OOP model?**
- 11. Explain the four pillars of OOP.**
- 12. Write the names of the basic pillars of OOP.**
- 13. What are the advantages of OOP in Java?**
- 14. What is a Class in Java?**
- 15. What is an Object in Java?**
- 16. What is the difference between a Class and an Object? (At least 4 differences)**
- 17. Name any program using Class and Object.**
- 18. What is Inheritance? Explain the types of inheritance.**
- 19. What is Polymorphism?**
- 20. What is the difference between Structure Programming and Object-Oriented Programming?**
- 21. Name and describe the data types in Java (diagram form).**
- 22. Name and describe the four data types in Java.**
- 23. Explain the purpose of the Boolean data type.**
- 24. What is the difference between Variables and Constants?**
- 25. What is Type Casting? Explain its types in Java.**

26. What is the difference between Widening and Narrowing type casting in Java?
27. What is the difference between Binary and Unary operators?
28. What are Constructors? Explain their types.
29. What is the function of the **break** and **continue** statements, and where can we use them?
30. What is Concatenation?
31. What do you mean by Strongly Typed and Loosely Typed programming?
32. What do you mean by Input Data in programming?
33. What is the difference between **System.out.println()** and **System.out.print()**?
34. Write a Java program to display your Roll Number, Course Name, and Technology Name on the console screen using NetBeans.
35. Write a Java **switch** statement to display the day of the week based on user input (1 = Monday, 2 = Tuesday, ..., 7 = Sunday).
36. List, draw, and explain the common Flowchart symbols (line-wise).
37. 1. Decision-making structures cannot be nested. True or false with give any example.
- 38.
39. 2. How do you perform more than one statement when a condition is true?
- 40.
41. 3. Correct the syntax error line by line.
- 42.
43. 1) If $x > 25$
44. 2) {
45. 3) $Y = x$;
46. 4) else
47. 5) $\%y = z$
48. 6) }

49.

50. 4. What function of break keyword/statement and where we can use it?

51.

52. 5. What function of default keyword/statement and where we can use it?

53. 1. Define Object Oriented Programming.

54. 2. What is Access modifier and their types?

55. 3. What do you mean by Encapsulation?

56. 4. How you can differentiate between the object and class?

57. 5. What is constructor and how many types of constructor.

58. 6. What is difference between the method and constructor.

59. 1. What is Operator and describe of relational operators with symbols.

60. 2. What difference between the binary and unary operators?

61. 3. What do you mean by preceding Operators?

62. 4. What do you mean by BODMAS operation?

63. 5. What difference between the (=, ==) operators?

64.
