

MPA IMPORTANT QUESTIONS.

- 1. Background Of Microprocessor and co-processor of 8086**
- 2. Memory segmentation.**
- 3. Describe the busses of computer system.**
- 4. Describe the pin diagrams with diagram".**
- 5. block diagram of 8086?**
- 6. Write Assembly code to display your biodata on the screen**
- 7. List of data types of assembly language.**
- 8. List of assembly language instruction which is consist of one operand**
- 9. Define the stack and related instruction.**
- 10. Define flowchart and algorithm.**
- 11. Define General –purpose registers in detail.**
- 12. Background of Microprocessor?**
- 13. Define Bus System.**
- 14. Write block diagram of Computer System.**
- 15. Convert the hexadecimal number into Binary number there are following.**
1) 45C 2) ABC 3) 290 4) 3D4F
- 16. Write of size of computer data.**
- 17. Define EMU8086 Write of size of computer data.**
- 18. Define EMU8086.**
- 19 Block diagram of 8085 Microprocessor**
- 20. Define Timing and control operation.**
- 21. What is program flowchart?**
chart?
- 22. Define data group of register in 8086 Microprocessor**
- 23. Define memory segmentation of 8086 Microprocessor.**
- 24. Write block diagram of 8086 Microprocessor.**
- 25. Shortly describe BIU and EU.**
- 26. What is formula of find Physical Address?**
- 27. Define memory segmentation of 8086 Microprocessor.**
- 28. Advantages of memory segmentation of 8086.**
- 29. Write block diagram of Computer Memory of 8086 Microprocessor.**

30. If code segment register is 2B8Ah and instruction, Pointer is A131h. Then finds the physical address of given instruction.
31. What are ASCII code of decimal and Hexa-Decimal following?
i) A ii) N iii) j iv) 0 v) 8 vi) space bar vii) Enter key
vii) viii)
32. What is purpose of READ and Ready pins of 8086 Microprocessor?
33. How you can define Min and MX pins of 8086 Microprocessor.
34. Write pins diagram of 8086 Microprocessor.
35. Define data types of assembly language.
36. Write structure of assembly program with description.
37. How many type instruction of 8086 microprocessor in the assembly language.
38. Define algorithm and flowchart and why we use.
39. How do work DIV and MUL Commands in assembly language for 8086 mp.
40. What is loop in computer programming perspectives?
41. How loop instruction work only explain.
42. Define unconditional jump.
